"The Last Days of Pompeii"

COPYRIGHTED, 1913, BY PHOTO DRAMA CO.

Lord Bulwer Lytton in his famous romantic novel, "The Last Days of Pompeii," immortalized the event and using data obtained from scientific research and investigation, peopled it with his imagination. Mr. George Kleine with his photo dramatization of Lord Lytton's novel will do even more to recall it to modern amusement lovers. His picture of the eruption gives a most impressive and vivid idea of the awful magnitude of this world-famed catastrophe. Mr. Kleine's photo drama, "The Last Days of Pompeii," at the Globe Thursday to Saturday, November 6, 7 and 8.

Without doubt the most dramatic event in the history of the world was the destruction of Pompeii in 79 A. D. by a terrific eruption of the volcano of Mt. Vesuvius. Fifteen years previous this delightful city on the shore of the Bay of Naples was rudely shaken and partially destroyed by an earthquake and its inhabitants were just recovering from the effects of it and rebuilding their public buildings and beautiful homes when the rage of Vesuvius was vented upon them. The volcano for hours poured forth volumes of smoke, hot flames shot up to the heavens and a steady downpour of clouds of hot dust, stone and lava kept falling on the doomed city until it was buried under twenty-eight feet of cinders, stones and lava, and so completely obliterated that all traces of its location even were lost for nearly seventeen centuries. Many of the inhabitants escaped, but a larger percentage perished. The eruption was accompanied by frequent earthquakes, and to add to the horrors a terrible storm raged plithre and came upon them so suddenly they were almost paralyzed with fear. The escape by means of it in their superstitious fear returned to the city, only to be destroyed by the foul poison and vapors of the air and hundred other agents of death provoked by the eruption.
